DIY Fixings: Must-Know Nuggets Before You Dive In

We're all about that reuse and recycle life, making sure your exhibition stand gets to bask in glory year after year. But hey, it won't be winning any longevity awards if it's looking like it's gone through a blender (remember, those stands have feelings, too!).

Only ONCO X approved fixings and methods to be used (advice available at the service desk) - Please keep these pointers in mind when you're planning your display because we'll have to charge any repair back to you if we find them injured in the line of duty! And remember: if you need any help making your display, get in touch before you reach for your tool box.

Don't make any holes in us

Don't paint us

Don't hang anything from our ceiling

Blutac

Velcro

Hanging Chains
